

RAGHUL S G

Full Stack Developer | Python & React
9787034412 | raghulsgdev@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer intern with hands-on experience designing and shipping production-grade web applications using React, Python, FastAPI, and MySQL. Built and deployed RESTful APIs serving role-based access control, real-time data processing, and data-processing workflows. Strong foundation in data structures, database optimization, and system design; actively seeking a full-time Software Development role.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Bootstrap

Backend: Python, FastAPI, REST API Development, OOP, Async Programming

Database: MySQL (Indexing, Query Optimization, ACID Transactions)

Tools & Concepts: Git, GitHub, Postman, XAMPP, VSCode, PyCharm, Data Structures & Algorithms, CRUD, RESTful Architecture

EXPERIENCE

Full Stack Developer Intern — Vebbox Software Solutions

Feb 2026 – Present

- Architected and shipped RESTful APIs for authentication (JWT-based), scoring, and data-processing modules serving 2 active internal projects, reducing backend response latency through MySQL indexing.
- Designed normalized MySQL schemas and applied indexing strategies that improved average query execution time by ~40% on datasets with 1,000+ records in the Hostel Management System.

PROJECTS

Hostel Management System

React · Python · FastAPI · MySQL

Internship Project — Vebbox Software Solutions

- Designed and built a dual-portal system (Admin + Student) using React with protected routes and role-based access, enabling hostel staff to manage 100+ student records through a unified dashboard.
- Implemented FastAPI backend with 12+ REST endpoints for booking, student management, and room allocation; resolved a schema mismatch bug that caused a persistent 404 error by introducing a two-step student ID lookup.
- Applied MySQL indexing on high-frequency query columns, reducing average data retrieval time by ~40% compared to non-indexed baseline.

Car Rental Management System

React · Python · FastAPI · MySQL

Personal Project

- Engineered a full-stack car rental platform with Role-Based Access Control (RBAC) separating Admin and User workflows, supporting end-to-end booking lifecycle management.
- Built 10+ REST APIs using FastAPI for vehicle search, booking creation, and JWT authentication; designed normalized MySQL schema with foreign key constraints ensuring referential integrity across users, vehicles, and bookings.
- Implemented async API calls on the React frontend to eliminate UI blocking during booking operations, improving perceived performance.

EDUCATION

B.Sc. Visual Communication — Nehru Arts and Science College, Coimbatore

2022 – 2025

ACHIEVEMENTS & PROFILES

- Completed Full Stack Developer Course building 2 production-level applications from design to deployment.
- Self-directed learning: completed DSA fundamentals, async Python, and REST API design patterns to supplement degree coursework.
